NATIONAL PHOTOGRAPHIC INTERPRETATION CENTER		PHOTO INTERPRETATION BRIEF	
Title: Objects on Launch Pads at Launch Area A, Drovyanaya ICBM Complex, USSR	Geo Coords: 51-24N 113-00E		Publication No: NPIC/R-130/64
	NPIC Target No: 0201-53		Date: February 1964

References: USATC Series 200, Sheet 0201-4A, 1st ed, Oct 58 (S)
NPIC Project N-120/64 (DIAXX 64-5)

photography of the Drovyanaya ICBM Complex revealed objects on both launch pads at Launch Area A. The object on the east pad is a possible missile transporter (including prime mover) approximately 150 feet long and 15 feet wide. The aft end of the transporter (positioned toward the forward end of the pad) seems to be slightly higher than the remainder of the vehicle. The forward end of the trans-

porter (toward the rear of the pad) appears to consist of two sections with separations of less than [redacted]. The object on the west launch pad may be an environmental shelter or a missile transporter minus the prime mover. It appears as three different sections and has an overall length of approximately 125 feet. The section toward the forward end of the pad is slightly out of line with the other sections.
